DETAILED ACTION

1. Amendment filed on 04/19/2006 has been entered.
2. Claims 1, 3-9, 11-15, 17-25, 28-30 are presented for examination.

Response to Arguments

3. Applicant's arguments filed 04/19/2006 have been fully considered but they are not persuasive. Because alter the resistance in the sensing branches of the sense amplifier for reducing the offset voltage is not support in original specification.

Response to Amendment

4. The amendment filed 04/19/2006 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Altering a resistance in sensing branches of sensing amplifier.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
6. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission

Art Unit: 2827

amounting to a gap between the necessary structural connections. See MPEP

§ 2172.01. The omitted structural cooperative relationships are: **claim 2 is canceled.**

7. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

8. Claim 1,3-4,6-8,9,11-12,13-15,17,21-25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Accordance with specification, applicant does not disclose a compensating for altering a resistance in sensing branches of sense amplifier, or how to alter a resistance in inverters of sense amplifier. In specification, applicant just supporting a compensating circuit is provided that corrects for a voltage offset between the inverters only ([0011]), but not reveal any altering a resistance in sensing branches.

As described above the claims 1,3-4,6-9,11-12,13-15,17,21-25 are not reconsidered.

Allowable Subject Matter

9. Claims 18-20, 28-30 are allowed.

Claims 18-20, 28-30 include allowable subject matter since the prior art made of record and considered pertinent to the applicant's disclosure does not teach or suggest the claimed limitations. Lee (U.S. Patent No. 5,883,846), and others, does not teach the claimed invention having wherein the third and fourth NMOS transistors form a compensating circuit configured to correct a voltage offset between the first and second inverter circuits of the latch and the fifth NMOS transistor as claims 18-30 disclosed, and the first inverter having an input coupled to the input of the delayed sense amplifier enable signal source and an output coupled to an input of the second inverter that has an output coupled to the output of the delayed sense amplifier enable signal source as claims 28-30 disclosed.

Conclusion

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
